

# ***Welcome to AP Chemistry***

My name is Mrs. Brown, and I am delighted that you have chosen to join us in AP Chemistry class. AP Chemistry takes commitment and hard work, but it forever will change how you look at the world.

Performing well on an AP exam is more than just successful completion of a course; but the gateway to success in college. The goal of AP Chemistry is to develop advanced reasoning and inquiry skills, such as designing a plan for collecting data, analyzing data, and connecting topics across domains.

It is important to begin with a strong foundation of chemical concepts that were learned in your prior chemistry class.

Therefore, to review and strengthen your skills over the summer, please read chapter 1 and 2 in the AP Chemistry text (Zumdahl) and complete the attached quiz.

**Bring the completed quiz to the first day of class.**

## **Materials Needed**

- Scientific graphing calculator
- 2-inch Binder (clear view cover)
  - Zumdahl Text, 9th Edition
    - Computer
    - Notebook
